◆ AI Overview

Several companies in the U.S. are involved in the production and processing of neodymium, a rare earth element crucial for making strong permanent magnets. While China dominates the global rare earth market, the U.S. is actively working to develop its domestic capabilities in rare earth mining, processing, and magnet manufacturing. [↗](#)

Key Players and Projects:

MP Materials:

This company owns and operates the Mountain Pass rare earth mine in California, which produces high-purity neodymium and praseodymium (NdPr) oxide. They also have a facility in Fort Worth, Texas, that is producing neodymium magnets and has partnered with General Motors. [↗](#)

USA Rare Earth:

This company is developing a mine and processing plant at Round Top, Texas, which will produce neodymium, praseodymium, and other rare earths. They also have a facility in Stillwater, Oklahoma, that is planned to produce sintered neodymium magnets. [↗](#)

Noveon Magnetics:

Based in San Marcos, Texas, this company is producing neodymium iron boron (NdFeB) magnets. [↗](#)

Lynas Rare Earths:

While based in Australia, Lynas has a large-scale rare earths processing facility in Kalgoorlie and is a significant player in the global rare earth market. [↗](#)

Arnold Magnetic Technologies:

This company is a leading global manufacturer of high-performance permanent magnets, including those made with neodymium. [↗](#)

Current Status:

Search bar with icons for close (X), voice search, image search, and search (Q). On the right, there are icons for a flask, a grid of dots, and a circular logo with a bird.

- However, there is significant investment and development in domestic capabilities for rare earth mining, processing, and magnet manufacturing. [↗](#)
- The U.S. government has also taken steps to support the domestic rare earth industry, including tariffs on rare earth magnet imports from China. [↗](#)
